III. HAZARDS IDENTIFICATION

Routes of Entry: Inhalation, ingestion, skin, eyes., Absorption.

Medical Conditions Aggravated: Skin disease including eczema and sensitization. Respiratory disease including

asthma and bronchitis. Eye disease. Digestive tract disease. Liver disease. Kidney

disease.

Immediate (Acute) Health Effects

Inhalation: Can cause severe central nervous system depression (including unconsciousness).

Causes respiratory tract irritation. Dust irritating to respiratory tract. Chronic lung disease (silicosis) and/or lung cancer may result from prolonged/repeated breathing of the dust of this material. Can cause severe respiratory irritation, dizziness, weakness,

fatigue, nausea, headache and possible unconsciousness.

Skin Contact: Continued or prolonged contact may irritate the skin and cause a skin rash

(dermatitis). Moderately irritating to the skin. Can cause moderate skin irritation, defatting, and dermatitis. Not likely to cause permanent damage. No hazard in normal

industrial use.

Eve Contact: Can cause mechanical irritation if dusts are generated. Can cause moderate irritation,

tearing and reddening, but not likely to permanently injure eye tissue.

Skin Absorption: Toxic and may be harmful if absorbed through the skin; may produce target organ

damage. Minimal hazard in normal industrial use. May cause gastrointestinal

discomfort.

Ingestion: Aspiration of material into the lungs can cause chemical pneumonitis which can be

fatal. Irritating to mouth, throat, and stomach. Can cause abdominal discomfort,

nausea, vomiting and diarrhea.

Target Organ Acute Toxicity:

Naphthalene eyes, blood, liver, kidneys, skin, CNS

m-Xylene CNS, eyes, blood, liver, kidneys, skin, GI tract, respiratory system

Cumene eyes, respiratory system, skin, CNS Ethyl benzene eyes, respiratory system, skin, CNS

o-Xylene CNS, eyes, blood, liver, kidneys, skin, GI tract, respiratory system CNS, eyes, blood, liver, kidneys, skin, GI tract, respiratory system

1,2,4-Trimethylbenzene eyes, skin, respiratory system, CNS, blood respiratory system, eyes (in animals: lung cancer)

Long-Term (Chronic) Health Effects:

Carcinogenicity: ACGIH. IARC. NIOSH. NTP. OSHA. Contains a known human carcinogen.

Reproductive and Developmental

Toxicity:

A component in this product has been shown to cause birth defects and reproductive disorders in laboratory animals at doses that could be encountered in the workplace.

Mutagenicity: No data available to indicate product or any components present at greater than 0.1%

is mutagenic or genotoxic.

Inhalation: Upon prolonged and/or repeated exposure, can cause severe respiratory irritation,

dizziness, weakness, fatigue, nausea, headache and possible unconsciousness.

Skin Contact: May cause lingering affects but not likely to result in permanent damage if the

exposure is eliminated. Upon prolonged or repeated contact, can cause moderate skin

irritation, defatting, and dermatitis. Not likely to cause permanent damage.

Eye Contact: Upon prolonged or repeated contact, dust contact can cause mechanical irritation.

Upon prolonged or repeated contact, can cause severe irritation. Eye contact may result in corneal injury. Symptoms may include discomfort or pain, excess blinking and tear production, with marked redness and swelling of the conjunctiva. Temporary

vision impairment (cloudy or blurred vision) is possible.

Skin Absorption: Upon prolonged or repeated exposure, harmful if absorbed through the skin. May

cause severe irritation and systemic damage.

Target Organ Chronic Toxicity: Skin. Respiratory Tract. Eyes. Nervous System. Digestive Tract. Liver. Kidneys.

Blood.

Supplemental Health Hazard

Information:

No additional health information available.

IV. FIRST AID

Inhalation: Remove to fresh air. If breathing is difficult, have a trained individual administer

oxygen. Remove to fresh air. Get medical attention immediately. Have a trained individual administer himidified oxygen. If not breathing, give artificial respiration. Remove to fresh air. If breathing is difficult, have a trained individual administer oxygen. If not breathing, give artificial respiration and have a trained individual

administer oxygen. Get medical attention immediately.

Eyes: Immediately flush eyes with plenty of water for at least 20 minutes retracting eyelids

often. Tilt the head to prevent chemical from transferring to the uncontaminated eye. Get immediate medical attention and monitor the eye daily as advised by your

physician.

Skin Contact: Wash with soap and water. Remove contaminated clothing and launder. Get medical

attention if irritation develops or persists.

Ingestion: First aid is normally not required. Minimal risk of harm if swallowed. Do not induce

vomiting. Seek medical attention immediately. Provide medical care provider with this MSDS. Do not induce vomiting and seek medical attention immediately. Drink two glasses of water or milk to dilute. Provide medical care provider with this MSDS.

Notes to MD: No additional first aid information available.

V. FIRE FIGHTING MEASURES

Flammability Summary:

Flash Point: 5 Upper Flammable/Explosive 1

Limit, % in air:

Lower Flammable/Explosive

Limit, % in air:

50 (CALC.) °F 13.1 @ 77° F

1.3 @ 77° F

Fire Hazards: Empty containers that retain product residue (liquid, solid/sludge, or vapor) can be

dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose container to heat, flame, sparks, static electricity, or other sources of ignition. Any of these actions can potentially cause an explosion that may lead to injury or death. Vapors may be ignited by sparks, flames or other sources of ignition if material is above the flash point giving rise to a fire (Class B). Vapors are heavier than air and

may travel to a source of ignition and flash back.

Extinguishing Media: Dry chemical Use alcohol resistant foam, carbon dioxide, or dry chemical

extinguishing agents. Water may be ineffective but water spray can be used extinguish a fire if swept across the base of the flames. Water can absorb heat and keep exposed

material from being damaged by fire.

Fire Fighting Instructions:

Use methods for the surrounding fire.Do not enter fire area without proper protection including self-contained breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location due to the potential of hazardous vapors and decomposition products.

Hazardous Combustion Products: Carbon monoxide

VI. ACCIDENTAL RELEASE MEASURES

Health Consideration for Spill Response:

Exposure to the spilled material may be irritating or harmful. Follow personal protective equipment recommendations found in Section VIII of this MSDS. Additional precautions may be necessary based on special circumstances created by the spill including; the material spilled, the quantity of the spill, the area in which the spill occurred. Also consider the expertise of employees in the area responding to the spill.

Spill Mitigation Procedures General Methods: Prevent the spread of any spill to minimize harm to human health and the environment if safe to do so. Wear complete and proper personal protective equipment following the recommendation of Section VIII at a minimum. Dike with suitable absorbent material like granulated clay. Gather and store in a sealed container pending a waste disposal evaluation.

VII. HANDLING AND STORAGE

Handling:

As with all chemicals, good industrial hygiene practices should be followed when handling this material. Wash thoroughly after handling. Avoid contact with material. Ground and bond containers when transferring material. Use spark-proof tools and explosion-proof equipment. Keep in air-tight containers- material is hygroscopic. Remove contaminated clothing and wash before reuse. Minimize dust generation and accumulation. Harmful or irritating material. Avoid contact and avoid breathing the material. Use only in a well ventilated area.

Storage:

Keep container closed when not in use. Keep away from heat, sparks, and flame. Do not store in direct sunlight. Keep away from sources of ignition. Store in a cool dry ventilated location. Isolate from incompatible materials and conditions. Keep container(s) closed.

VIII. ENGINEERING CONTROLS AND PERSONAL PROTECTIVE EQUIPMENT

Engineering Controls:

Engineering controls must be designed to meet the OSHA chemical specific standard in 29 CFR 1910. Explosion proof exhaust ventilation should be used. Facilities storing or using this material should be equipped with an eyewash and safety shower. Use process enclosures to control the level of dust in the air. Local exhaust ventilation or other engineering controls are normally required when handling or using this product to avoid overexposure.

Protective Equipment Respiratory Tract:

Respirators should be selected by and used under the direction of a trained health and safety professional following requirements found in OSHA's respirator standard (29 CFR 1910.134) and ANSI's standard for respiratory protection (Z88.2-1992). A written respiratory protection program, including provisions for medical certification, training, fit testing, exposure assessments, maintenance, inspection, cleaning, and convenient, sanitary storage should be implemented.

Eyes: Wear chemically resistant safety glasses with side shields when handling this product.

Wear additional eye protection such as chemical splash goggles and/or face shield when the possibility exists for eye contact with splashing or spraying liquid, or airborne material. Do not wear contact lenses. Have an eye wash station available.

Skin: Avoid skin contact by wearing chemically resistant gloves, an apron and other

protective equipment depending upon conditions of use. Inspect gloves for chemical break-through and replace at regular intervals. Clean protective equipment regularly. Wash hands and other exposed areas with mild soap and water before eating,

drinking, and when leaving work.

XII. ECOLOGICAL INFORMATION

Overview (for ingredients): No data available. This material is not expected to be harmful to the ecology.

XIII. DISPOSAL CONSIDERATIONS

Waste Description for Spent

Spent or discarded material is a hazardous waste.

Product:

Disposal Methods: Comply with all Local, State, Federal, and Provincial Environmental Regulations.

Dispose of by incineration following Federal, State, Local, or Provincial regulations.

Potential EPA Waste Codes: If discarded, this product is considered a RCRA ignitable waste, D001.

Components Subject to USEPA Land Disposal Restrictions:
